

A NEW EVENT HORIZON

**“To one who has faith, no explanation is necessary.
To one without faith, no explanation is possible.”**

St. Thomas Aquinas

The material world we see and interact with is not all there is.

But sadly for many it is the totality of their view of reality. The belief that there is nothing but matter and its forms is part of the delusion spun out from the gigantic construct of materialism so graphically portrayed over 3000 years ago in the second chapter of the Book of Daniel. Down through the ages depicted in Daniel's Great Image, humanity has now finally arrived at the time of the Feet of this Image.

It is a time like no other in human history. Four thousand years of wrong priorities based on material greed and power has brought exploitation, damage and death to this world and its peoples. As Daniel wrote, the kingdoms of the Feet in last days of human history are partly strong and partly weak. This is a fairly accurate view of how the world is in our own times. Not only has materialism divided us from nature and other species it has divided us from each other. Today in spite of all our efforts to the contrary, the human world remains divided on a planet in crisis.

All thinking people now clearly see that human expansionism and consumerism is unsustainable. Hundreds of thousands of caring individuals from all races and beliefs are aware of this, and are committed to helping save this world and all its creatures. Without their commitment life would be far worse in many areas than it already is. And yet collectively we are still being fatally driven by the construct of power and greed so clearly evidenced by both governments and global corporations which put profit before life. For us to survive we need a significant change of priorities.

Never before has there been a time when the term '**Last Days**' was so applicable.

Yet at the very same time we are on the brink of social and environmental disaster we are also on the very edge of the event horizon of a wider cosmic perspective.

Like the ants in our gardens, we are part of a much greater reality.

For the parochial control systems run by the rulers of planet Earth this is an inconvenient truth. Any worldwide realisation or engagement with another reality beyond this world will reveal the artificial nature of the construct that the mass of humans have served and believed in for thousands of years.

Not only does Daniel's prophecy of the Great Image predict that the Last Days of this construct will be in the Days of the Feet – our times – it also predicts that something will come from Heaven at that very same time to destroy the whole edifice!

After this event, according to Daniel, a new world government by "*the Kingdom of Heaven*" will be established. Given that Daniel's prophecy has proved right for nearly three thousand years, what can this *Kingdom of Heaven* be?

Can it be the Second Advent of Jesus, as many Christians believe?

Is there a higher cosmic power beyond Earth that is much closer than we think?

Is there any evidence that there may be a non-Earthly power converging with our planet; perhaps the "*Kingdom of Heaven*" that Daniel predicted?

Whatever beliefs we may have, or not, about this, the fact is, that it is only our times: the Days of the Feet, that meet all the criteria of Daniel's prediction for the dramatic arrival into the human world of an irresistible extraterrestrial power.

We have to question, when there are so many problems that need solutions right now here on Earth, why are governments, global corporations and powerful individuals now suddenly spending trillions trying to return to the Moon and go to Mars? Whatever they may say – it seems like they are either preparing to run away or frantically trying to understand whatever they believe is coming our way.

Why now?

For decades there have been no manned missions to the Moon.

After Apollo 17 they came home and stayed home. Lack of money was a weak excuse on a par with claims by some NASA spokes people that they had lost the technology. None of this adds up. It all sounds suspiciously like fake news made up to pacify the masses, whilst behind the scenes something else is going on.

Neither can it be any coincidence that over the past ten years, activity and structures on the Luna surface has become more visible and at the same time structures on Mars have been quietly played down. Years ago it had become all too obvious to photo analysts that early photos of both the Moon and Mars had been blurred and altered. In more recent missions this obfuscation has been done by software. Although in many cases this is transparently not effective and seems to mostly rely on belief in the illusion that '*there's nothing but rocks here*'.

Interestingly most children when shown relevant photos of Mars with no biased commentary, do not only see rocks.

Is someone else already on the Moon and Mars, and in our Solar System?

The evidence from independent photo analysts and researchers over many years seems to indicate that just like the ants in our gardens; we are not the only intelligent life-forms in our corner of the universe.

Here below are two views of Sinus Iridum crater on the Moon, photographed by Canadian astro-photographer, Bruce Swartz.

Both these photographs, and many others, show undeniably obvious structures

Why is what happening on the Moon hidden from the vast majority of humanity? Bruce Swartz and other independent astro--photographers have not only photographed structures on the Moon, they have also videoed and photographed increasing activity there: lights, moving objects and large craft crossing the Luna surface or rising into space. But when it comes to Mars, NASA's own photographs speak for themselves. Here below are two from the Curiosity Rover Mission.

If photographed on Earth there would be no doubt these were ruins.

If photographed on Earth most people would think these were photos of ruins or bits of a machine of some kind. What is it doing on Mars? Who made it?

These are merely four of thousands of photographs taken over the years, not just by NASA but also by astronauts, astronomers and the military as well as many independent researchers; of structures, objects and unknown craft in our solar system. There is compelling and often undeniable evidence for the continued presence of non-human intelligences in our skies, in deep space and on the solar planets. Such craft were once known as UFO's now they are officially referred to by the Pentagon as UAPs: *Unknown Ariel Phenomenon*. The truth that we are not alone in the solar system is gradually being filtered into human consciousness.

Years ago this view was ridiculed, then vociferously denied - but now it is becoming increasingly obvious that someone else is in our vicinity.

What may this mean for us? Whoever and whatever is in our solar system, it can be no mere coincidence that this is happening now, in the time Daniel identified as the Last Days. Daniel predicted that at that time something momentous would come from Heaven to change our world for ever.

All those years of wrong priorities are now an avalanche of past mistakes falling upon all life on Earth. Even though caring people from all nations, classes and races have done the best they can in line with Jesus' example of love for others, they have always been up against the blinkered materialist construct. Today this is exhibited in the cognitive dissonance of world leaders who, are like people sitting having dinner totally ignoring the fact that there is a fire raging in the kitchen. No wonder ordinary people are looking, everywhere, anywhere, for someone to save them from the fatal consequences of all the wrong priorities of the materialist construct.

Daniel predicted that before disaster strikes change will come, not from Earth but from Heaven. Jesus said that he would return from Heaven in the Last Days and according to Daniel these *are* the Last Days. Humanity is on brink of destruction but also on the very edge of a new cosmic event horizon that will change everything.
