

THE ILLUMINATION OF CONSCIENCE

“Hey oh witchi tai tai oh witchi tai oh” ‘Everything is (in) everything’.

Native American saying

Conscience: what is it?

The inner sense of what is right or wrong: moral watchdog or guardian angel?

It is as elusive as your own shadow but just as constant. Sometimes in spite of our moral philosophy or value system, or what the majority may believe to be true we are impelled to decide which truth we will follow for our own conscience sake.

The illumination of conscience - is a phrase borrowed from Roman Catholic visionary, Conchita Gonzales. Now in her seventies, Conchita was one of four Roman Catholic children, from the village of Garabandal in Northern Spain, who, during the 1960s, all shared visions of what many believe to be the Virgin Mary. The well documented events at Garabandal from 1961 to 1965 are complimentary to the *‘interventions’* at Lourdes and Fatima.

At the start of the Covid19 Pandemic, in March 2020, Conchita wrote:

“God is separating us from the values of this world. In the silence of the Church or in our home, we can now do an examination of conscience so that we can purify whatever prevents us from hearing the Voice of God clearly. We can honestly ask God to tell us what He wants from us today and continue to do so every day. And spend as much time as possible with God in church or somewhere in your home or where you find silence.”

Neither the pandemic nor Conchita’s statement were entirely unexpected.

Three years previously, an elderly lady, now in her 90s, had already written to us about a soon to come event, which would affect everyone on our planet:

“Globally, nationally, personally and spiritually.”

And indeed - she was 100% right - the global pandemic – *has* affected everyone. Parallel to the SARS2 outbreak, across the globe things are polarising at many levels. Both bad and good in this world have become more clearly highlighted.

What Conchita calls the *‘illumination of conscience’* may well be one of a series of forthcoming events, which in the next few years will play a significant part in changing human perspectives and values.

Both this and all current events fall within a prophecy made over 3000 years ago.

This is the prophecy of the Great Image in chapter 2 of the Book of Daniel.

For an in-depth investigation of this we refer you to *‘The Quantum Mechanics of Prophecy’* which is featured on this website and is available on Amazon.

The Great Image described by Daniel, reflects the artificial construct of domination and exploitation that has caused so much damage and destruction to our planet.

Nebuchadnezzar king of Babylon had a dream, which only Daniel was able to interpret. The Great Image revealed in the king's dream gave the broad brush strokes of history: Babylon as the head of Gold was followed by Medo-Persia as the chest of Silver, Greece as the hips of Bronze; Rome as the legs of Iron and all nations after that as *the Feet of Iron and Clay*: partly weak and partly strong. Prophetically the timeline of the Great Image has proved correct for over 3000 years.

The Great Image reflects a human construct of imperial power that divides us from each other, from the earth, and from our Creator. This towering edifice of a man made of metals, symbolises greed, wealth and power; as such it represents the domination and exploitation that is the nature of all imperialistic systems which have always served the interests of a minority of powerful men.

Civilisation has been driven by wrong priorities since the times of Babylon. In every century at the very top are the *"rulers of the darkness of this world"*, which the apostle Paul warned of.

Just as in the film 'Matrix', humanity in general is unaware of the artificial nature of the Construct they live within. But it only remains credible for as long as people do not question it. This is no easy matter, for behind all our political, financial, industrial and social systems is the whirring Wizard of Oz-like machinery of the Great Image.

This illusion is historically driven by dominion through material power which has always been the hallmark of the Construct. Only now do we realise the whole construct of wrong priorities driving civilisation is unsustainable in any terms.

According to Daniels' prophecy; we live in the *Times of the Feet* of the Great Image. It is at this time that the whole construct falls into ruin when a momentous event arrives from the sky to destroy the whole artificial edifice.

Whether we like it or not we are living in the Last Days of the Great Image.

Contrary to some claims about the Last Days, the event depicted in Daniel 2 is *NOT* the end of the world, but it *IS* the end of the human construct of power and greed, which flowed down in a direct line from Babylon to infect subsequent empires. Throughout history billions have suffered oppression, war, poverty and disease merely in order to serve the needs of a ruling minority driving this artificial construct. This situation came more clearly into focus during the Covid19 pandemic: The time which Conchita called 'the illumination of conscience.' Consequently we are now seeing increasing civil unrest: protests and divisions, conflicts and wars. For thousands of years war and material power has been the driving force of human civilisation. In spite of all the inspired individuals and periods of renaissance and enlightenment, materialistic priorities continue to infect all religious and political systems and have led to more divisions and exploitation.

When Europeans came to the New World they brought with them the sickness of greed. Powerful, wealthy men then wanted to buy land and own natural resources. This was a puzzle to Indigenous Peoples who had a different view of life. How could anyone own the land or the water or the sky? It made no sense to them. All life on Earth was the gift of the Creator to his children.

Not mentally enslaved to the materialist construct that had indoctrinated the Europeans, Indigenous Peoples considered themselves caretakers of the land, not owners. The only answer the European invaders had to this view was deception, violence and genocide. They had no illumination of conscience. Since Babylon every civilisation has been governed and indoctrinated by the wrong priorities of the Great Image which is now embedded in all systems of control. The reality is: the same thinking which created our problems in the first place will never produce real solutions. Wrong values and wrong priorities distort our perceptions of reality. This even underlies one famous statement about equality.

*"We hold these truths to be self-evident, that **all men are created equal**, that they are endowed by their Creator with certain unalienable Rights that among these are Life, Liberty and the pursuit of Happiness."*

American Declaration of Independence of July 4th 1776

At face value it all sounds right and good. Unfortunately the reality is that out of the 34 signatories only 13 did not own slaves, the rest were slave owners, including Thomas Jefferson who wrote those words and yet remained a slave owner for the rest of his life. In reality the phrase "**all men are created equal**" – did not include women, and certainly did not include black people or indigenous nations. Even though our leaders may speak the right words, it is what they do that really matters. As Jesus once said, '**By their fruits you will know them...**' All things considered, what we now know is that we have been led from the top by wrong priorities. Today as we stand at the Feet of the Great Image, we face two basic facts: that materialism is unsustainable, and that we are in the Last Days of all Earthly empires. All rulers and governments need to seriously change their priorities.

They all need to step back, and step down - and LISTEN - to the Earth and its Creator and humbly prepare for a new order of rule on planet Earth. There is only one colour that unites all creatures on this world; the red of the blood that flows in our veins. The basic reality is: One Spirit of Life connects us all.

Chief Seattle said,

“This we know: The earth does not belong to man, man belongs to the earth. All things are connected like the blood which unites us all. Man did not weave the Web of Life, he is merely a strand in it. Whatever he does to the Web he does to himself”.

Individuals of good intent of all races throughout history have recognised this and because of that have done amazing things to try and restore compassion, equality and justice for the poor and dispossessed: for people and animals and all life on our planet. This has always been done against the odds; against the tyranny of material greed and power. Millions now realise that the materialist construct driving governments and global corporations’ is a Doomsday Machine for all life on Earth.

It is at this time, in the Days of the Feet of the Great Image, that an illumination of conscience is more relevant than ever before. We need to see beyond the construct to the greater cosmic and spiritual reality that not only surrounds us but is also within each of us. Jesus put it plainly when he said, *“The kingdom of heaven is within you.”* This is something qualitatively different to, and greater than, the material kingdoms that make up the Great Image in Daniel chapter 2, which is destined to fall into ruin. In Daniel’s prophecy we see the end of all Earthly kingdoms and the beginning of the kingdom or rule of Heaven on Earth.

In the Bible ‘*Kingdom*’ also means ‘*Rule*,’ which is the rule of God’s Love in the human heart. The message that Conchita’s ***illumination of conscience*** has for us all at this crucial time is for us to LISTEN - Not to corporate greed, political power or all the vacuous blustering spinning from the materialistic construct - but to the quiet presence of God within us. Only by accepting that presence will we be truly connected – to each other, to the Earth, and to our Creator.

Whatever trials we may each face at this time, whatever seemingly impossible task is before us, we are never truly alone. Through the illumination of conscience we can become connected to the eternal reality and love of our Creator.

The days of the Great Image are drawing to a close.

The kingdom of Heaven is coming and no human contrivance can stop it.
